

META BUSD COIN

The Future of Metaverse &
DeFI Integration

WHITEPAPER

www.metabusdcoin.com

INTRODUCTION

MetaBUSDCoin (MBC) launched on December 19th 2021 after delays to the initial schedule for security updates and internal controls to protect investors. With 80 BNB raised during its presale and a team already showing immense transparency, the foundation was set for a unique launch in the BSC space with MBC coming out of the gate at a 250k market cap.

In its first few days, MBC blasted off going from its humble beginnings of 250k market cap to over 600k before dipping to a sizable floor of 500k market cap, double the initial starting point. As of January 4th 2021, MBC sits comfortably at around 5 million market cap, with so much yet to come.

OUR MISSION

Our mission is to change the way users interact with Defi through a suite of innovative products and services focusing largely on Metaverse integration. We plan to accomplish this with a team of experienced developers leveraging a history of **AR/VR** development coupled with strategic coordinators, community managers, and other valuable team members to put out the best possible experience.

TOKEN

MetaBUSDCoin (**MBC**) is a deflationary reward token, rewarding holders in a stable coin pegged to the Binance Smart Chain (BSC). This allows all holders to enjoy their rewards without having a negative impact on **MBC**.

TECHNICAL **INFORMATION**

TOKEN NAME : MetaBUSDCoin

SYMBOL : MBC

INFRASTRUCTURE : BEP20

DECIMAL : 18

TOTAL SUPPLY: 500,000,000,000,000

0xf14d3692b0055db9ca4c04065165d59b87e763f1

ROADMAP

PHASE ONE

Creation and deployment of Smart Contract
Website and social media facelift
Introduction of non disclosure agreements
Rewards portal
Initial Marketing
Contract Audit
Coin Market Cap and Coin Gecko listings
Staking
NFT release(s)
Gamification

PHASE TWO

Development
Wallet release with AR viewer
MBC Swap
NFT staking
Bridging
Professional marketing & legal onboarding
Prototype hard wallet
MBC VR Lobby (Alpha)
Exchange Listings
VR wallet with dApp (Beta)
Curator platform launch

ROADMAP

PHASE THREE

Integration

VR Lobby with wallet and swap function (Open Beta)

VR NFT content partnerships

Mass marketing push to mainstream media

Full release of VR wallet-vault

P2E VR card game & platform (Beta)

Large CEX listings

Large brand partnerships

Open market VR space

Used for marketing **2%**

MetaBUSDCoin (MBC) will create long-term and sustainable value through a suite of offerings targeted at integrating the emerging technologies of AR and VR with DeFi based digital assets. One of the largest value drivers will be our robust marketplace, where retail partners can enter into an immersive metaverse to conduct trade and commerce. Transactions, interviews, meetings, and more can be held in this virtual realm.

The initial market for MBC will be existing crypto enthusiasts who are eager to interact and trade in a virtual environment with retail, entertainment and other partners we plan to onboard. By offering a unique combination of providing a new way for users to interact with things from their finances to shopping habits through virtual and augmented technologies we hope to quickly catch early adopters in this emerging field. We plan to onboard various retailers as well as entertainment providers to supplement our ecosystem, enticing them with unique direct to consumer offerings, a platform to conduct commerce, and new innovative ways to deliver their products or services. The fuel for this new transparent and trustworthy approach in the metaverse is MetaBUSDCoin.

MBC will be a driving force for interaction in an immersive environment to facilitate direct consumer engagement, allowing MBC to be a medium of exchange in a useful and valuable way. We hope to leverage a first-mover advantage to quickly onboard brands and offer new marketing opportunities. Through this framework, MBC will be able to fuel an entire ecosystem of innovative products and services, creating value for its holders while providing incentive for projects or people to onboard.

While MBC's core development will be supporting its metaverse integration goals, the team will continue to have numerous offerings in the short and medium term to drive engagement as well as price action. We hope that you will join us early, and stay with us late as we aim to create and innovate.

Join us into the metaverse as we bring to life DeFi. Our dedicated team is focused on bridging a gap in DeFi and virtual social interaction. MetaBusdCoin is a deflationary reward token, rewarding holders in a stable coin pegged to the Binance Smart Chain. This allows all holders to enjoy their rewards without having a negative impact on MetaBusdCoin. We encourage the taking of profits in the form of your daily reflections. You can track these BUSD rewards through our reward tracker. In order to instill full confidence and trust the core team has fully doxxed.
